

B5 Southside Apartments, Birmingham

Main Contractor:	Shepherd Construction Ltd
Architects:	Weedon
Contract Period:	75 weeks
Contract Value:	
Package Value:	£316,000

THE PROJECT

We laid 40,000m² of Gyvlon screed at this development of one and two bedroom stylish and innovative apartments situated at the heart of the city centre, featuring private courtyards, a tree lined boulevard and secure parking to many properties. We were called upon to make sure that this project had a rapid turnaround time as there was a narrow timescale. As with other city-based developments there were a number of challenges posed by the location and we overcame the logistical obstacles

by working closely with the contractors and suppliers to minimise disturbance and disruption both on site and to the general public.

These apartments have a prime location and have been highly praised for their design by award-winning local architect Glenn Howells. Some 461 apartments are included in this relatively low-rise scheme.
