

## Heartlands Hospital, Birmingham

<b>Main Contractor:</b>	Kendrick Construction Ltd
<b>Architects:</b>	Mason Richards
<b>Contract Period:</b>	48 weeks
<b>Contract Value:</b>	£30,000,000
<b>Package Value:</b>	£870,000

### THE PROJECT

This project was a huge, prestigious re-development and building programme transforming the existing out-moded mixture of red brickwork and dated interiors, to a bright, modern space.

We were commissioned to carry out metal stud partitioning and in excess of 6,000m<sup>2</sup> of screeding works.

Along with Lafarge Plasterboards we designed and

produced a system that achieved HTM56 specification, within budget and programme restraints.

Kendrick Construction chose us to assist in the design and construction of this contract. We are renowned for helping the main contractor where our expertise is relevant – bringing greater value for money and reducing obstacles along the way for the contractor
