

Holiday Wharf, Birmingham

Main Contractor:	Wates Construction Ltd
Architects:	AEDAS
Contract Period:	48 weeks
Contract Value:	
Package Value:	£1,600,000

THE PROJECT

For this new development comprising retail bars and restaurants on the refurbished site of a grade II listed wharf facade we carried out metal stud partitioning using Lafarge Plasterboard systems and 10,000m² of screeds. We used 2,000m² of Lafarge Aggregates screed C self-placing concrete and 8,000m² of Isocrete K screed.

This was the first time we used Lafarge Screed and also a first for us in working with Wates Construction. We used a self-placing concrete. Both the main contractor and ourselves were delighted with the results of this innovative solution to the specific requirements of the development.
