| Architects: | Nightingale Associates |
| Contract Period: | 12 weeks |
| Contract Value: | £16,300,000 |
| Package Value: | £85,000 |

THE PROJECT

We carried out 7,100m² of Gyvlon screed at this brand new 7,100m² three-storey teaching, research and library facility.

The North Staffordshire Hospital is one of the largest acute hospitals in the country and serves a population of around 500,000 residents. The Hospital provides a

comprehensive range of fully integrated acute clinical and non-clinical services, from a large single complex.

Having worked with Laing O'Rourke on many prestigious projects, we were delighted to be commissioned to assist in this important development.
