

The PostBox Apartments, Birmingham

Main Contractor:	Taylor Woodrow Construction Ltd
Architects:	Ian Derby Partnership
Contract Period:	52 weeks
Contract Value:	
Package Value:	£300,000

THE PROJECT

The Postbox is stylish city living at its most desirable. More than 250 contemporary one and two bedroom apartments are enviably positioned at the heart of Birmingham's most fashionable new neighbourhood.

We carried out all Isocrete screeding at the development. We laid 28,000m² of Gylon Screeds in a year-long project.

This is a key example of how our wealth of experience helps minimise disruption in the confines of a project at the heart of a city centre. We met the logistical challenges presented by working closely with the contractors and our suppliers. We worked quickly and efficiently, to carry in pours in excess of 1,000m² and laying 2,000m² in one day.
