

Private Patients Unit, Walsgrave Hospital

Main Contractor:	Sol Construction
Architects:	James Totty
Contract Period:	13 weeks
Contract Value:	£24,000,000
Package Value:	£90,000

THE PROJECT

We laid 6,000m² of Isocrete K screed at this new 54 bed private hospital as part of the Walsgrave super hospital development in Coventry.

The development is very much a partnership between the private healthcare sector and the NHS and is very much an asset to the community. We are always pleased to be

recognised for our expertise in the health sector and this project underlines our commitment to best practice.

The re-development of Coventry's Walsgrave Hospital was the largest so-called PFI 'super hospital' of its day.
