

Russell's Hall Hospital, Dudley

Main Contractor:	Sir Robert McAlpine Plc
Architects:	Percy Thomas Partnership
Contract Period:	156 weeks
Contract Value:	£160,000,000
Package Value:	£8,750,000

THE PROJECT

We were commissioned to carry out both Isocrete screeds (40,000m²) and Drylining Works. The project originally detailed over 16 different wall types to achieve HTM56 requirements but working alongside Lafarge Plasterboard Ltd we managed to reduce the number down to four.

The final phase saw us work within the existing hospital and carry out £3,250,000 of drylining works within 20 weeks. We completed the work on time and within budget.
